Go beyond one-size-fits-all

Choose from leading LLMs optimized for speed, accuracy, or cost.

Use your agents, your way

Use GitHub Copilot, your own custom agents, or the third-party ones you already rely on.

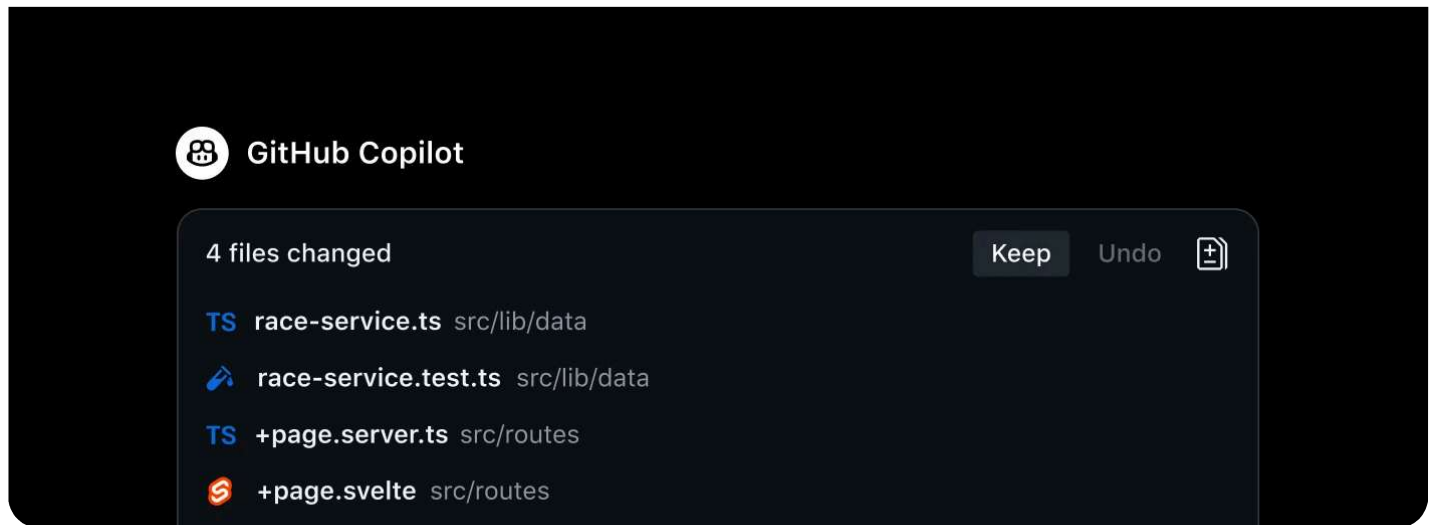

Stay in your flow

Copilot works where you do—in GitHub, your IDE, project tools, chat apps, and custom MCP servers.

WORKFLOW

Code, command, and collaborate

AI that works where you do, whether in your editor, on the command line, or across GitHub.

Make your editor your most powerful accelerator

Copilot in your editor does it all, from explaining concepts and completing code, to proposing edits and validating files with agent mode.

Allow users to pin side panels #1520

Ship faster with AI that work alongside you

Assign tasks to agents like Copilot, Claude by Anthropic, and OpenAI Codex, and let them plan, explore, and execute work autonomously in the background.

[Explore Copilot cloud agent >](#)

Bring AI to your terminal workflow

Direct Copilot in the terminal using natural language and watch it plan, build, and execute complex workflows powered by your GitHub context.

Tailor-made for your organization

Shape Copilot to your business needs. Customize what it knows, how it acts, and where it connects.

Turn Copilot into a project expert

Scale knowledge and keep teams consistent by creating a shared source of truth that includes context from your docs and repositories.

[Try Copilot Spaces >](#)

Manage agent usage with enterprise-grade controls

Track activity with detailed audit logs and enforce governance by managing agents from a single control plane.
